1. Selective Combinations Crankshaft Journal Bearings

Selective Combinations Crankshaft Journal Bearings

The crankshaft journal bearings of the 6LP series employ the selective combinations. The combinations as follows. The block journal biameter codes are shown on the ladder frame (bearing cap) and the crank journal diameter codes are punched on the crank.

When applying a crankshaft journal bearings, there is the necessity of asking for the crankshaft journal bearings which suits on the table of Table 1. Since the combination is indicated to Table 2, please determine from this.

(1) Always replace bearings with those having the same number.
If the bearing number is unknown, add numbers indicated on the crankshaft and connecting rod and select a bearing having a number equal to that obtained by addition.
There are five types of standard bearings, which are identified by marks "2","3","4","5" and "6".
